SUMMARY

Software Engineer (B.Tech 2024, 2+ years at Manexus) leading client workstreams. Ship LLM-integrated applications, agent tooling, and workflow automation across TypeScript, React/Next.js, Node.js, and Python, plus on-chain systems in Solidity. Own features end-to-end, from data model and API contract to deploy.

EXPERIENCE

Software Engineer — *Manexus* June 2024 – Present

- Lead engineer on three client workstreams (Kolektiva RWA tokenisation, the AI Attendance platform, and the n8n LLM automation suite), owning architecture, delivery, and client handoff.
- Build and ship product features across a React/Next.js and Node.js codebase serving 5,000+ users, owning work from data model through API contract to deployed UI.
- Integrate LLM APIs into production workflows — content generation, document extraction, and agent orchestration — replacing manual review with automated classification and cutting handling time by ~60%.
- Design and ship 40+ REST endpoints consumed by web and mobile clients; own API contracts across frontend and backend consumers.
- Cut deploy time from 25 to 6 minutes by rebuilding CI/CD on Git-based pipelines with staged environments.

Full-Stack Intern — *Manexus* March 2024 – June 2024

- Promoted to full-time Software Engineer after a three-month internship.
- Built React and Next.js interfaces and Node.js REST endpoints for client-facing web applications.

SELECTED PROJECTS

Tenzro — Manexus client · open distributed network for AI inference, agents, and compute 2026 – Present

Stack: TypeScript, Rust, Next.js, Node.js, Python, MCP | tenzro.com

- Contribute to a decentralised AI execution network where inference, agents, and workflows run across independent nodes rather than centralised servers.
- Build TypeScript client interfaces and SDK surfaces for node discovery, model serving, and agent orchestration, consumed by 3 internal applications.

Kolfly — Manexus client · AI-powered influencer (KOL) marketing platform 2025 – Present

Stack: Next.js, React, TypeScript, NestJS, PostgreSQL, pgvector, OpenRouter, Stripe, Apify | kolfly.com

- Built the AI Writer Studio model tiers (Free / Cheap / Pro) on a backend-driven catalog, threading per-request model overrides through 5 generation paths with server-side validation.
- Fixed credit-accounting drift where the displayed cost diverged from the amount charged, stamping each AI proposal with its resolved tier cost and debiting it at apply time.

Workflow Automation Suite — Manexus client · n8n + LLM pipelines (workstream lead) 2025 – Present

Stack: n8n, LLM APIs, LinkedIn API, Node.js, PostgreSQL, webhooks | Proprietary | n8n.io/creators/athash007

- Built a LinkedIn comment-to-DM engine: watches post comments, classifies intent with an LLM, and sends personalised outreach, generating ~120 qualified conversations/month.
- Designed every workflow with retries, fallbacks, and idempotency keys, sustaining ~98% completion across 3,000+ monthly executions with no double-sends.

Kolektiva — Manexus client · RWA fractional property platform (workstream lead) 2024

Stack: Solidity, Ethereum, Web3.js, Next.js, Node.js

- Built ERC-standard tokenization contracts enabling fractional ownership of real-estate assets: 1,000+ registered users and 20 Indonesian properties onboarded, ~$3M in property value tokenised.
- Implemented investor onboarding, KYC gating, and offering-lifecycle pipelines end-to-end.
- Designed secure transaction flows and on-chain ownership tracking for primary issuance and secondary transfers.

TECHNICAL SKILLS

AI & LLM	OpenAI / Anthropic APIs, RAG, vector search, function calling, agent orchestration, MCP, n8n
Languages	TypeScript, JavaScript, Python, Rust, Solidity, Java, C++, SQL
Frontend	React.js, Next.js, Tailwind CSS, React Native, Flutter
Backend	Node.js, Nest.js, Flask, Django, REST, WebSockets
Blockchain	Solidity, Ethereum, Hardhat, Web3.js / ethers.js, contract testing
Data & Cloud	PostgreSQL, MySQL, AWS, Docker
Tooling	Git, GitHub Actions, CI/CD, Jest, Figma

EDUCATION

Vishwakarma Institute of Information Technology, Pune — B.Tech, Computer Engineering 2024 | CGPA 9.48/10
